PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of hands-on experience building production web applications across banking, quality-control, and RPA domains. Strong with React.js on the frontend and Java with Spring Boot on the backend, including REST API design, Spring Security, and PostgreSQL/MySQL data modeling and tuning. Comfortable working in Agile teams and shipping features end-to-end — from UI components and state management through to database queries and deployment.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Material UI, Axios, Responsive Design

Backend: Java 8, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, DTOs, ModelMapper, Exception Handling (@ControllerAdvice), Pagination, Lombok, JWT, CORS, Maven

Databases: PostgreSQL, MySQL — schema design, indexing, query optimization

Tools & Practices: Git, IntelliJ IDEA, Postman, Agile / Scrum, Code Reviews

PROFESSIONAL EXPERIENCE

Full Stack Developer | Auro LED, Bengaluru

Oct 2025 – Present

- **Built and shipped a Bank Loan Application** processing ~500 daily transactions in production, automating multi-stage inspection workflows that previously required manual handling.
- **Developed a React.js dashboard** for real-time loan-status tracking, enabling operations teams to monitor cases without depending on engineering for reports.
- **Designed and developed 15+ REST APIs** in Spring Boot using Spring Data JPA and DTOs, achieving average response times under 200 ms after MySQL indexing and query tuning.
- **Reduced critical SQL query execution time by ~35%** by adding composite indexes and restructuring lookup tables across high-traffic data models.
- **Collaborated across UI, QA, and DevOps teams** to deliver full-stack releases on schedule and resolve integration issues quickly.

Full Stack Developer | Effigo Global, Bengaluru

Jan 2025 – May 2025

- **Contributed to two enterprise modules** — a QC Inspection tool and a Dynamic Form Builder — adopted across procurement workflows by 200+ internal users.
- **Built a schema-driven form builder in React.js** supporting dynamic layouts, conditional fields, multilingual content (3 languages), and real-time preview, eliminating repetitive form-development work.
- **Implemented role-based access control and CORS policies** using Spring Security, with no unauthorized-access incidents reported post-release.
- **Modeled a flexible PostgreSQL schema** with reusable templates and conditional-field logic, cutting new-form launch time by roughly half.
- **Delivered 10+ Spring Boot endpoints** with DTOs, model mapping, and centralized exception handling via @ControllerAdvice, supporting multilingual content and section-level permission rules.

React.js Developer | Athamas Technologies (VarChai Pvt Ltd), Bengaluru

Nov 2023 – Dec 2024

- **Worked on OnKlik.AI**, a web-based RPA platform that automated 5+ business workflows including email handling, invoice processing, and data export.
- **Built 20+ reusable React.js components** with Material UI, accelerating delivery of new features and improving design consistency across the product.

- **Integrated REST APIs using Axios** with consistent client-side state handling and sub-1.5-second data refresh on key views.
- **Participated in an Agile squad of six over 8 sprints**, contributing to code reviews and daily stand-ups while maintaining a low production bug rate.

KEY PROJECTS

Bank Loan Application | Auro LED, Production *Dec 2025 – Present*

Stack: React.js, Java, Spring Boot, MySQL, Spring Security, Git

- End-to-end loan processing for ~500 daily transactions with automated inspection workflow.
- 15+ REST APIs and tuned MySQL schema; average query time under 200 ms.

Dynamic Form Builder | Effigo Global, Enterprise Module *Feb 2025 – Mar 2025*

Stack: React.js, Java, Spring Boot, PostgreSQL, Spring Security

- Schema-driven builder with dynamic layouts, real-time validation, and 3-language support.
- Role-based access via Spring Security; reusable PostgreSQL templates with conditional fields.

OnClik.AI — Web RPA Platform | Athamas Technologies, Product *Nov 2023 – Dec 2024*

Stack: React.js, JavaScript, Material UI, Axios

- Automation platform for repetitive workflows (email, invoice, data export).
- 20+ reusable Material UI components powering core product features.

EDUCATION

B.E. in Computer Science | Kalpataru Institute of Technology, Tiptur *Aug 2019 – May 2023*

CGPA: 7.84 / 10

CERTIFICATIONS

- Java Bootcamp — Udemy
- Spring Boot Bootcamp — Udemy
